EDUCATION

Ontario Tech University

Toronto, ON

Honours Bachelor of Engineering (BEng), Software Engineering

Sept. 2021 – Apr 2026

- Enrolled in the **PEY Co-op** program, currently seeking **12-16 month Co-op/internship**.
- Relevant Courses:** Operating Systems, Embedded Systems, Web Programming, Software Design and Architecture, Data Management Systems, Design and Analysis of Algorithms
- Clubs and Societies:** Computer Science Club (General Member), FriendCircle (Marketing Associate)

EXPERIENCE

Software Developer Intern | *Java, Vue.js, PostgreSQL*

June 2024 – August 2024

AMJ Inc.

Toronto, ON

- Contributed to the development of a consulting platform application with a **Java (Spring boot)** backend and **Vue.js (Quasar)** frontend, creating new **Vue.js** pages to enable discussions, questions, and voting for ideas within the platform, supporting over **200 participants**.
- Managed **PostgreSQL** database integration and optimization for improved data handling and storage efficiency.
- Tracked project progress and collaborated using **Jira**, contributing to **Agile development cycles**, and ensuring timely delivery of features and bug fixes.

Computing Solutions Advisor

August 2023 – December 2023

Best Buy Canada

Toronto, ON

- Skilled in employing a **consultative sales approach** with customers to determine the best **computing solution** based on their requirements
- Optimized daily sales operations by executing product promotions, ensuring device protection, and promoting coverage through **Best Buy Memberships** and **Geek Squad Services**.
- Efficiently maintained and organized presentable merchandise to ensure continuous sales.

Technical Support Intern

May 2023 – August 2023

GAO Tek Inc. (remote)

Toronto, ON

- Contributed to global conference planning and assisted with developing strategies to **enhance website functionality**.
- Strengthened digital presence through web development, data sheets, and **SEO-driven digital marketing**.
- Identified and curated a diverse range of products for **website expansion**, contributing to increased offerings and enhancing user experience.

PROJECTS

TripGenie (Paris Travel Chatbot) | *Python, PyTorch, NLTK, JSON, Git*

August 2024 – Present

- Developed a travel itinerary chatbot using **Python** and **PyTorch** with a **neural network model** to interpret user queries.
- Created structured **JSON intents** to handle various travel-related questions, ensuring accurate responses.
- Integrated **NLTK** for **tokenization** and **bag-of-words** model to enhance query understanding and response generation.

BillSplitz | *HTML, CSS, JavaScript, React, Git*

- Developed an **intuitive web-based bill-splitting application** called “BillSplitz” using **React, HTML, CSS, JavaScript**, allowing users to easily manage expenses among friends.
- Utilized **React hooks** for **state management**, dynamically tracking and updating friend balances.
- Designed a clean, **user-friendly interface** with a sidebar for friend selection and a form for bill splitting to ensure smooth user interaction.
- Applied **modular coding practices** to improve **maintainability, scalability, and code reusability**.
